

AccessibilityNow® DocMD

Make your website documents accessible

Business Issues

With high demand for accessibility, increased regulations and with lawsuits on the rise, organizations are being faced with making their websites and documents accessible. In addition to compliance, this will create a better Customer Experience (CX) for your customers, employees and partners.

Most organizations begin the digital accessibility journey by making their websites accessible, but the hosted documents are overlooked, leaving these organizations exposed. The biggest challenge is that finding these hosted documents and determining if they are compliant can be an overwhelming task, let alone finding a way to convert them, or remediate them, into accessible documents.

Another problem organizations are facing is the time and expense associated with the remediation of hosted documents. They are finding that it can be a time-consuming process and quite costly, but it needs to be done not only because rules and regulations demand it, but because it's the right thing to do.

Solution

Crawford Technologies' AccessibilityNow DocMD is the answer organizations have been looking for. It is a cost-effective, easy-to-use and easy to deploy solution for automatically finding hosted documents, testing them for accessibility and providing various options for remediation.

As the tool is cloud based, it makes it very fast and easy to deploy, and because it was designed to be scalable, it is priced to fit any organization's website needs, large or small.

The intuitive GUI makes navigating the tool simple and takes the guesswork out of making website content accessible, and with its automation process it leads organizations into compliance in no time at all.

Benefits

- **Achieve and maintain website document accessibility compliance.** Facilitates a quick, straightforward and effortless process for scanning, testing and fixing public facing documents.
- **Save time and money.** Eliminates complicated tasks associated with document remediation. The trivial implementation delivers a cost-effective, scalable and flexible solution for website document compliance.
- **Avoid litigation risks and fees.** Eliminates the risk of being exposed to regulatory fees and fines by continually monitoring and evaluating documents on websites for accessibility conformity.

At a Glance

AccessibilityNow® DocMD provides everything needed to find, test and fix non-compliant documents on a website.

- Quick and efficient way to determine the true level of website document accessibility
- Cloud-based for easy deployment
- Cost-effective, scalable solution
- Intuitive, interactive and easy to setup with a web browser
- Dashboard shows progress and results
- Recurring schedule to monitor your site
- Supports PDF, Word, PowerPoint, Excel and EPUB documents
- Validates PDFs against WCAG, PDF/UA and HHS standards.
- Flexible and integrated remediation process
- Document accessibility statistics to develop an informed document remediation strategy

Solution Overview

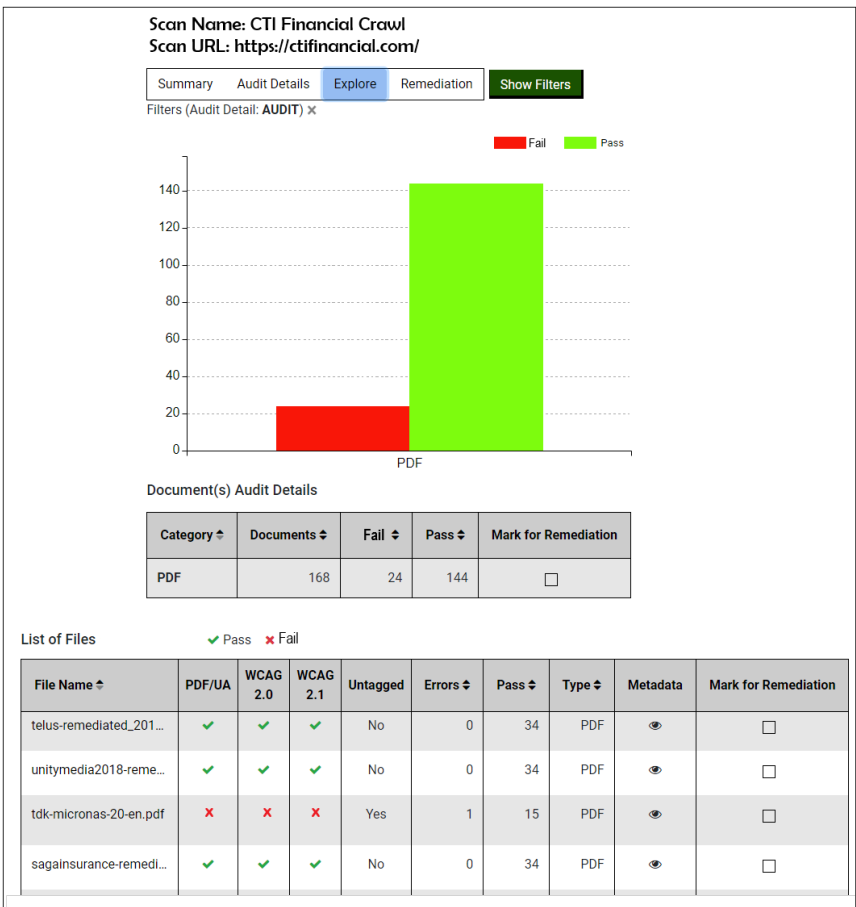

Effective and Robust Website Document Accessibility

Using efficient, cost-effective web-crawling technology, AccessibilityNow DocMD examines a website to identify the number of stored documents, and then performs an accessibility assessment of each one.

AccessibilityNow DocMD is a cloud-based, scalable enterprise platform solution, designed to meet the needs of small web sites as well as major enterprises. It validates PDF, Word, PowerPoint, Excel and EPUB documents.

Results, Reporting and Remediation

DocMD results are stored and can be used for various tasks, the most common being for reporting and remediation purposes. The below screen capture shows the results of a crawl, with the total number of each type of file. Part of the process of displaying the results is the ability to select files to be sent for remediation, this enables the ability to prioritize the documents before they are submitted.

CrawfordTech AccessibilityNow® DocMD

Specifications

- Scalable cloud-based platform with web-based access
- AWS EC2 Infrastructure. Designed to handle demand spikes
- Security and compliance capabilities, leverages AWS S3 for data protection, maintaining regulatory compliance

Why you may need AccessibilityNow® DocMD

- Do you have public facing documents on your website?
- Do you wonder how many documents are on your website?
- Are any of your website documents not WCAG and/or PDF/UA compliant?
- Do you have problems related to PDF accessibility?

If you answered yes to any of these questions, you will benefit from DocMD. These are common issues that many organizations face which are easily solved by **AccessibilityNow DocMD**.
